

Developer Fellowship

Get paid to ship Bitcoin open source. \$512/month, 6 months (extendable), 15-20 hrs/week.

Stipend	\$512/month, paid monthly on reliable rails
Duration	6 months, extendable for proven contributors
Commitment	15-20 focused hours per week, alongside any day job
Support	Named mentor, weekly call, PR review within ~48h
Community	Bi-weekly fellow sync, Discord, optional Bali hub access
Outcome	6+ PRs merged, one grant application submitted, path to independent FOSS work

Who Should Apply

- Completed a Bitcoin dev cohort (Code Orange, Chaincode, Summer of Bitcoin, or serious self-study)
- Can already write code and navigate a real codebase - we de-risk, not teach basics
- Visible GitHub activity - even one small merged PR counts
- Can protect 15-20 hours a week for 6 months, honestly
- Committed to Bitcoin specifically, not as a stepping stone to generic Web3 work
- **Fastest path in:** open at least one PR to your target project before applying

What You Can Expect From Us

- A named mentor matched to your target project, committed for the full 6 months
- A defined project and work plan agreed in Month 1 - no wandering
- Timely reviews and honest feedback on every PR
- Public amplification of your work - your GitHub profile is yours, we help people see it
- A clear arc: setup (M1), steady shipping (M2-3), deep work (M4-5), grant application (M6)
- Payment on time, every month - for a Global South fellow, reliability is the point

What We Expect From You

- **6+ PRs opened, ~3-4+ merged** over 6 months (merges depend on maintainers; quality and consistency are what you control)
- **Weekly public status update** - blog post, Nostr note, or GitHub discussion thread. Non-negotiable: our proof of work, your professional footprint
- **Weekly mentor call** - show up prepared; escalate honestly when blocked more than a week
- **Monthly report** by the 5th
- **Reviews, not just code** - from Month 4, review other contributors' PRs regularly
- **One knowledge-transfer artifact** - blog post, workshop, or curriculum improvement. One fellow compounds into ten future students

How It Can End Early

- No status update and no check-in for 2 consecutive weeks without cause
- Zero PR activity by end of Month 2 (Month 1 is grace, Month 2 is evidence)
- Work you cannot explain when asked - one warning, then done

Apply

- Send a focused proposal (GitHub, target project, 6-month plan) to fellowship@codeorange.dev, subject "Developer Fellowship - [Your Name]"
- Or PR it to `applications/<your-handle>.md`, or post in `#fellowships` on Discord
- Rolling review - response within 2 weeks
