

Educator Fellowship

Get paid to build the Bitcoin dev community in your city. \$256/month, 6 months (extendable), 10-15 hrs/week.

Stipend	\$256/month, paid monthly on reliable rails
Duration	6 months, extendable for proven educators
Commitment	10-15 focused hours per week, alongside any day job
Support	CC0 curriculum ready to run, facilitation coaching, event and hardware support
Community	Bi-weekly fellow sync, Discord, optional Bali hub access
Outcome	30+ participants reached, one successor trained, reusable materials on our GitHub

Pick Your Format (or combine)

- **Run a cohort** - Bitcoin Dojo (7wk), Decoding Bitcoin (8wk), Privacy Track (12 sessions), rawBit (10wk), or propose your own
- **Host a club** - PR Review Club, Optech Deep Dive, Reading Club, Rust for Bitcoiners. The key word is consistently
- **Host IRL events** - min. twice a month: self-custody, BitAxe mining, nodes, privacy workshops, hackathons, meetups
- **Create content** - tutorials, videos, translations into Bahasa Indonesia / Thai / Vietnamese. 2 substantial pieces/month, CC0

Who Should Apply

- You know Bitcoin well enough to teach it - cohort graduate, meetup leader, or deep personal study
- You want to do education seriously, not as a side hobby
- You can protect 10-15 hours a week for 6 months, honestly
- Consistency over charisma: a decent session every week beats a brilliant one twice

What You Can Expect From Us

- Ready-to-run open-source curriculum, facilitation coaching, honest session feedback
- Help with venues and hardware (nodes, signing devices, BitAxes) where we can
- Public amplification of your events and materials
- A clear arc: setup (M1), rhythm (M2-3), growth (M4-5), handoff and final report (M6)
- A path into the Developer Track if teaching makes you want to build instead

What We Expect From You

- **8 session credits per month**, averaged per quarter - every session logged within 48h
- **Two participant outcomes per quarter** - first PR, cohort completed, node deployed, or a participant starts facilitating. Activity without progression is a failed quarter
- **Monthly report** by the 5th, plus a weekly public signal (recaps, notes, progress posts)
- **Documentation** - write everything down so someone else can run your initiative
- **Train your successor** - the initiative should survive you

How It Can End Early

- No report and no sessions for 2 consecutive weeks without cause
- No participant outcomes by end of Month 3 after coaching support
- Repeated no-shows to sessions you announced

Apply

- Tell us your format, topic, city, and audience - fellowship@codeorange.dev, subject "Educator Fellowship - [Your Name]"
- Or PR it to `applications/<your-handle>.md`, or post in `#fellowships` on Discord
- Rolling review - response within 2 weeks
